

Takudzwa Titus Nyanhanga

Software Developer

📍 Harare, Zimbabwe | 📞 [+263787980222](tel:+263787980222) | ✉ titus@vetech.co.zw | [LinkedIn](#) | [Github](#)

Profile

I'm a passionate software developer with a flair for crafting cutting-edge software solutions for desktop, web, and mobile use

Internships

Google Developer Students Club Co-Lead
Google LLC

Sep 2023 - July 2024

Huawei Student Ambassador to University of Zimbabwe
Huawei Technologies

April 2022 - July 2024

Work History

Fullstack Developer

Kalekt Analytics, Zimbabwe
Feb 2025 - Present

- Responsible for developing, maintaining and designing in-house systems.

Product Manager

Tech Palette, United Kingdom
Jan 2025 - Present

- Supervised the development of a robust membership management system for gyms across the United Kingdom

Software Developer

Tech Palette, United Kingdom
Jan 2024 - Dec 2025

- Led the development of Property Swift, a property records management system that allows users to make property transfer requests through Her Majesty's Land Registry.
- Supervised a team of developers to ensure project success

Mobile Application Developer | Consultant

Afrosoft Holdings, Zimbabwe

Jun 2024 - Jan 2025

- Led the development of a Customer Service WhatsApp chatbot for National Railways of Zimbabwe Contributory Pension Fund.
- Led the development of the customer service mobile application for the NRZCPF. The application allows pensioners to access their pension accounts, update their banking details, and see a history of their pension payouts.
- Designed the system architecture and database design to scale and perform optimally for the thousands of user traffic expected from their pensioners.
- Developed ePay, a banking application for the Tanzanian market. The application allowed merchants to request payment from users and generate reports.

Nocode Associate

no-code rebels, Kyiv, Ukraine

Apr 2023 - Jan 2024

- I was responsible for the development and maintenance of Darsel, an Edutech (Education technology) system for teachers from low-resource schools to manage classrooms, homework, and study resources.
- I developed the frontend of Kabukura.ai, A social networking platform like X(formerly Twitter) for Japanese investors to network and chat about the Japanese stock market and different investment opportunities.

Mobile Application Developer | Intern

Afrosoft Holdings, Zimbabwe

Nov 2022 - May 2023

- I was responsible for resuscitating the ZANUPF mobile application, adding new features as per client request, and overseeing the deployment of the app on the Google Play Store and Apple App Store.
- Participated in an exercise to restructure the database design for the ZANUPF Member management system. The goal was to design the system to scale to handle the millions of users expected by the client.
- Developed a meeting scheduling application for the board members of ZIMPLATS, a local mining company. The application allowed the board members to stay on top of meetings and easily access meeting notes.
- Oversaw the deployment of the Telone Insure-me mobile application to the Google Play Store.

Software Engineer | Intern

Telco Broadband and Beyond, Zimbabwe

Sep 2022 - Nov 2022

- Aided in the development of the Telco Dialer mobile application. A mobile application for clients to make calls over VoIP using their Telco accounts.

Education

BSc Honors Computer Science

University of Zimbabwe

Aug 2020 - July 2024

- Appointed Huawei student ambassador to the University of Zimbabwe.
- Appointed Google Developer Students Club Co-Lead.
- Selected for the 2022 Huawei Seeds for the future program.
- Participated in the 2022 UZ Research, Innovation, and Industrialisation Week and featured our project in the national newspaper, The Herald.

Certificates

Flutter Development With Dart

Udemy
July 2022

CISCO IT Essentials: PC Hardware and Software

Netacad
July 2021

CISCO: PCAP - Programming Essentials in Python

Netacad
July 2021

Skills

- Android and iOS Application development
- System Architecture design
- Database design
- Collaboration with remote teams
- Server Configuration and System Deployment
- Backend Development
- Web development

Languages

- Dart - Mobile application development using Flutter.
- Python - Backend system development using Flask
- Go - Development of RESTful APIs with Go
- SQL Databases - MySQL, PostgreSQL
- NoSQL Databases - MongoDB, Firebase
- No-code tools - XANO, Weweb, Make.com, Framer
- Swift - Development of iOS applications using Swift

Other Projects

Kmg Connect

A cross-platform mobile application that allows KMG Vital links customers to top up credit and make low-cost local or international VoIP calls.

Deliviro

A cross-platform mobile application that allows small delivery businesses to automate their pickup, dropoff, and alert system. The application helps business owners stay on top of every delivery, from inquiry to drop-off and payment.

Murez Mobile Application

An iOS and Android application to allow students at the University of Zimbabwe to source off-campus accommodation. The application works by allowing agents to post residences and earn commission when students pay for accommodation
